

# Compact, flexible confidence

## Philips IntelliVue MP5 patient monitor

The IntelliVue MP5 patient monitor delivers IntelliVue monitoring power and functionality in a compact and rugged housing to match the demands of a wide range of care environments both in and out of hospital. Used with the IntelliVue Guardian Early Warning Score (EWS), the MP5 is designed to aid caregivers on the general floor in early recognition of subtle signs of patient deterioration. Each member of the IntelliVue family of networked patient monitors gives care teams clear information to assess patients and make confident decisions. All share an intuitive interface, innovative Clinical Decision Support tools, and outstanding design.

### Key advantages

- Compact, rugged housing to meet the demands of transport in and out of the hospital
- Intuitive touchscreen and renowned ease of use, with industry-leading measurements
- Wired and wireless connectivity, and expanded capabilities for care

# PHILIPS

# A clear connection to your patients

## Advanced features for ease of use

The MP5 features an intuitive touchscreen and renowned ease of use, with industry-leading measurements, clear display, touchscreen operation, and one-step smart touch commands to allow you to focus on the patient, not the monitor. Clinical Decision Support tools such as Horizon Trends, ST Map and ProtocolWatch reveal more information when it counts, enhancing clinician confidence. The IntelliVue Guardian EWS helps caregivers take vital signs and calculate an Early Warning Score fast and easily, aiding in early recognition of subtle signs of patient deterioration.

We've redesigned the user interface to improve visibility of patient data, make it easier to use, and to enhance compatibility with standard software.

Capture and review diagnostic 12-lead ECGs at the monitor before sending them to the IntelliVue Information Center (PIIC). Print cardiograph-type, diagnostic 12-lead ECG reports from the bedside. With the IntelliVue Information Center iX (PIIC iX) review 12-lead interpretation and previous 12-lead ECGs directly at the bedside and trigger 12-lead export to an ECG archive. Each NBP measurement now generates a column in the vital signs trend table.

Measurements for other values are added to provide a comprehensive vital signs data set for the NBP measurement time, offering a more complete picture.

## Wired and wireless networking for continuous connection

The IntelliVue MP5 connects to the IntelliVue Clinical Network, which can span the hospital enterprise. You can manage your patient's care with the confidence that data collection won't be disrupted, no matter where patients are located on the network.

## Expanded capabilities

Enhance the compact IntelliVue MP5 by connecting it to a large display with IntelliVue XDS software, adding a high-resolution bedside display to make it easier to clearly see vital patient information at a distance. XDS remote-control functionality gives you the flexibility to access and control the IntelliVue MP5 to enhance your workspace ergonomics. To support clinical workflow efficiency a large display solution with IntelliVue XDS software also allows local printing from the IntelliVue MP5 monitor.

### Commonly required measurements, built in

- ECG, SpO<sub>2</sub><sup>1</sup>, and NBP available as standard. Non-ECG option also available.
- Choice of up to two invasive pressures and temperatures (with an optional port for Welch Allyn SureTemp).
- Optional tympanic temperature.

**Dynamic Wave** area features waves that automatically adjust in size depending on the number of waves configured.

### CO<sub>2</sub>/gas monitoring

- Choice of mainstream, sidestream or Microstream CO<sub>2</sub>.
- Anesthesia monitoring with IntelliVue G1 and G5 anesthetic gas modules.

**Wired and wireless connectivity** with easy switching between modes.

**Sturdy** housing (Class 7M3) to withstand rough handling.

**Comfortable handle** and bedrail mount for transport.

**Touchscreen operation** designed for easy information input and intuitive onscreen navigation with one-touch commands.

**Video out** allows use of larger external display.

**Optional USB** for barcode scanner.

**Optional bed rail hanger** fits securely and provides a good viewing angle.

**Optional Early Warning Scoring** supports your rapid response program in early identification of deteriorating patients.

Philips offers a **wide range of supplies**, including NIBP cuffs, SpO<sub>2</sub> sensors, Microstream CO<sub>2</sub> accessories and a variety of cables and leads to optimize performance of your Philips equipment.

### Telemetry as a parameter (TAAP) and wireless telemetry as a parameter (WTAAP)

display telemetry data through a direct or wireless connection to a telemetry transceiver. Wireless telemetry expands capabilities to provide untethered in-room access to telemetry data in near-realtime.

**Lightweight** at approximately 4 kg (8.8 lbs.) including battery.

**No user setup required** for typical use. A range of screen configurations are included.

**21.3cm (8.4") color SVGA display** with up to **4 waveforms** is bright and easy to read.

**Optional integral recorder** with 5cm (2") strip offers convenient documentation when needed.

**Up to four hours battery operation** with one lithium ion battery.<sup>2</sup>

**IntelliVue MP5 and a large display solution** with Philips IntelliVue XDS software.

1. Choice of Philips FAST SpO<sub>2</sub> or Nellcor OxiMax SpO<sub>2</sub>

2. With basic monitoring configuration (automatic brightness reduction, ECG/RESP and SpO<sub>2</sub> measurements in use, NBP every 15 minutes).
